ENGINEERS WEEK[®]

FEBRUARY 21-27, 2021

SWENESS.ORG

FEBRUARY 25, 2021

During Engineers week (the week of February 21st), we invite you and your students to explore what engineering is all about and how engineers make the world a better place. The DiscoverE organization offers lots of information and STEM activities related to various engineering disciplines. The Society of Women Engineers (SWE) also offers STEM related activities and encourages you to join or start your own engineering club. Don't forget to explore your local library for books and e-books about engineered things like bridges, famous scientists like Marie Curie, and famous engineers like George Washington! What!? Yes, he was a surveyor and engineer. Below are links and titles to get you started. Happy Engineers Week!
